6.15 uk.gov.gchq.syntheticdatagenerator.serialise.Serialiser< I > Interface Template Reference

Inheritance diagram for uk.gov.gchq.syntheticdatagenerator.serialise.Serialiser< I >:

Public Member Functions

- void [serialise](#) (final Stream< I > objects, final OutputStream output) throws IOException
- Stream< I > [deserialise](#) (final InputStream stream) throws IOException
- default String [getClassName](#) ()
- default void [setClassName](#) (final String className)

6.15.1 Detailed Description

IMPORTANT: All instances of this interface must be thread safe. That is, they must support multiple threads performing calling either [Serialiser#deserialise\(InputStream\)](#) or [Serialiser#serialise\(Stream, OutputStream\)](#) concurrently. The easiest and recommended way to do this is to make the `Serialiser`

instance stateless; don't store anything related to a particular de/serialisation operation in class member fields.

6.15.2 Member Function Documentation

6.15.2.1 deserialise()

```
Stream< I > uk.gov.gchq.syntheticdatagenerator.serialise.Serialiser< I >.deserialise (
    final InputStream stream ) throws IOException
```

Deserialise an InputStream into a Stream of objects.

Parameters

<i>stream</i>	the input stream to deserialise
---------------	---------------------------------

Returns

the deserialised object

Exceptions

<i>IOException</i>	if the input stream couldn't be read from.
--------------------	--

6.15.2.2 `getClassName()`

```
default String uk.gov.gchq.syntheticdatagenerator.serialise.Serialiser< I >.getClassName ( )
```

6.15.2.3 `serialise()`

```
void uk.gov.gchq.syntheticdatagenerator.serialise.Serialiser< I >.serialise (
    final Stream< I > objects,
    final OutputStream output ) throws IOException
```

Serialises a Stream of objects to an OutputStream. If
objects

is
null

, then nothing will be written.

Parameters

<i>objects</i>	the stream of objects to be serialised
<i>output</i>	the output stream to write the serialised bytes to

Exceptions

<i>IOException</i>	if something fails while writing the object stream
--------------------	--

6.15.2.4 `setClassName()`

```
default void uk.gov.gchq.syntheticdatagenerator.serialise.Serialiser< I >.setClassName (
    final String className )
```
